OBJECTIVE

To secure a challenging position where I can utilize my technical skills, enhance my knowledge, and contribute effectively to the organization's success.

EDUCATION

Electronics and telecommunication engineering(3rd Year)

Jagadambha college of engineering and technology, Yavatmal. 2024 – 2028

EXPERIENCE

Raymond UCO Denim Pvt. Ltd. (Working in engineering depertment)

- Engineering Trainee / Engineering Intern

- Supported engineers in equipment inspection, troubleshooting, and repairs.
- Followed safety standards and maintenance procedures in the production environment.
- Maintained maintenance records and prepared basic technical reports.
- Worked with cross-functional teams to ensure smooth plant operations.
- Monitored machine performance to improve efficiency and reduce downtime.

PROJECTS

Job and Internship Matching Platform (Website)

- A web-based platform designed to connect students, fresh graduates, and job seekers with suitable internship and job opportunities. The system uses user profiles, skills, education details, and interests to recommend relevant openings from employers. Companies can post vacancies, review applications, and shortlist candidates, while users can create profiles, upload resumes, and apply for opportunities online

LPG Gas Leakage Detection System (Mini project)

- The LPG Gas Leakage Detection System is a safety-based electronics mini project that detects the presence of LPG gas and alerts users to prevent accidents. It uses an MQ-2 gas sensor to continuously monitor the air for LPG. When the gas concentration exceeds a predefined limit, the system automatically activates a buzzer and LED to provide an immediate warning. This project is suitable for homes, kitchens, laboratories, and industrial environments to enhance safety.

TECHNICAL SKILLS

Programming Languages: C, C++, Javac, Python

Development tools: Github, Claude ai, MS Office

Relevent Coursework: Object Oriented Programming, Computer Networks
